**Design & Installation**

### Commissioning

Quality installations help to guarantee the efficiency of all grain store projects. Harvest Installations personal approach to installation and commissioning is a key part of that quality. Each installation undertaken by our own engineers carries on this commitment to providing the very best final product for the customer.

### Maintenance

Our service team take the same pride in their work as installation and commissioning. Time taken to thoroughly service and check each machine increases its operating life and maintains the high efficiency of drying for which the Harvest range is known.

## Design, Delivery, Installation, Commissioning, Maintenance

### Design

With a long standing reputation for innovative design and cost effective solutions to grain drying, Harvest Installations can answer the questions for your current and future grain drying and storage needs.

Be it a new grain store development, or updating and refurbishing existing buildings, we have the experience and equipment to match your requirements.

all installations. Specialist teams are required to give the very best result to customers at each stage of a build. Harvest Installations prides itself on the professionalism of its installation teams and of the final product handed over to the customer.

### Delivery

With its own delivery vehicles, and use of specialist carriers, Harvest Installations will coordinate deliveries with customers or main contractors to ensure work continues to today's tight deadlines.

Many items are delivered direct from UK and European suppliers direct to site with smaller items and Constant Humidity Controllers being transported on our own vehicles.

### Installation

Working with selected quality suppliers Harvest Installations offers an unrivalled level of finish to
